# About This Game

**Skyling: Garden Defense** is a 2D, isometric maze game that blends classic arcade-style game play with a lighthearted world of blooming plants, colorful monsters and sleepy cats.

Touch every square in the maze without being caught by a monster to rescue the garden. Use elevators, gates, switches and sleeping cats to your advantage! Pick up and drop garden cats to open new maze paths, block monsters, and make a hasty escape.

Sound simple? Skyling may look like a casual game on the surface, but each of the 30 puzzling levels is harder than the last. You'll need all your old-school arcade skills to survive.

Inspired by classics like Pac-Man, Q*Bert and Crystal Castles, Skyling: Garden Defense is a challenging, addictive maze game for all ages.

- 30 gardens to rescue

- A variety of unique, adorable monsters

- Simple and intuitive game play

- Mouse, keyboard and gamepad controls supported

- Three star scoring system to challenge skilled players

- Leaderboards to compare scores with friends

This is a great game that reminds me a little of the old Sim Copter PC game from the '90s. Sure there are a few bugs here and there, but I seem to always fix them by restarting the game from the main menu. The only one I can't fix is the fact that the achievements never unlock. I would love to have that issue resolved.. Very good! I really like it.. Volume three is an emotional rollercoaster that ends with a heartwarming, if somewhat rushed, conclusion to this tale of *E.T. with cute anime girls.. Amazing, so much nostalgia goodness. Sorry, but this game is too outdated for my taste. It just never grabbed me like rebirth did (even though you could fly one ship!) and now that X4 has been released, why would I play an outdated version of X4? I know people like to say this game is superior to X4 but it's only currently superior in terms of content (and mods). And that's only because this is the third version of X3: Reunion and because this game has had years for egosoft to patch it!*

*X4 is still being updated and two dlcs are on their way. I'm sure in time X4 will be equal to this game (maybe even superior) but with a better engine, modern game design, better mechanics, a more immersive universe and a modern UI. That is why this game struggled to hook me. This game had some strange game design choices that I disliked. Be it because of poor choice from the devs or limitations of the time. To name but a few:*

*Only able to save at a station until you buy the ability to save in space!*

*No cockpit view. Why?*

*Can't walk around your ship.*

*Terrible station and boarding mechanics. A station is just one giant structure that has to be connected to other giant stations like string. X4 has better stations. Stations that are actually modular.*

*Dumb AI. Colliding into each other or into asteroids.*

*Terrible UI.*

*Terrible tutorials.*

*Poor voice acting. (rebirth has terrible voice acting too but x4 doesn't)*

*If anyone is seriously thinking of buying this game or is struggling to get immersed into this game, buy X4.*

*X4 has the potential to be the best space sandbox games of all time. This was the best x game once upon a time. But now it's outdated and technology is only getting better every year. It's time for the series to evolve!. If you are looking similar like Super smash bros, this feels like a good way to do it.This game does not deserve all the hate it's gotten.*
*The story is good.*
*The gameplay is good.*
*The graphics are really good. The\u00a0SOUNDTRACK is AWESOME.*
*The effects and animation are good.. Bought this for 2 friends and me. On my high end system it does not start single player somehow when i click.*
*=(. You can kill Short Round over and over and over again.*

*12/10, would kill Short Round again*

These cars are nowhere near as satisfying to drive as I thought they would be. They feel like every other car in the game. Four of the cars have identical sounding engines, and the FXXK, one of the loudest Ferraris in existence, sounds like a muted V8.

Overall, the DLC doesn't seem that high quality in this game. I'd stick with the base game or get Assetto Corsa instead.

FINAL SCORE: 4\/10

IN A NUTSHELL:  *THE HORSE DIED.. This game is not awesome, and I can say that after how long I've played it, the gas is used too fast, after so long it becomes tedious fixing potholes in the road, or struggling to find what gravel you need because the developers were too lazy to mark them! Save your $10 and buy yourself something useful! I'm not happy at all, quite frankly disappointed, I'm getting a refund \ud83d\udc4e\ud83c\udffb. Kinda boring, used a guide the whole way through, but if I were playing this on mobile I'd probably have more fun with it due to its game style. I can appreciate the quality and polish of the game itself.. So now that I have put enough time into Hexel 2.5, or should I say Hexel 3 now, I think I can finally put in a honest review on how I feel about this program.*

*For someone like myself who started to work into pixel art I can very easily say that Hexel 3 is a fantastic program. It's easy to learn, it opens up options for what you can do and it's just down right fun to try out some of the stuff you can test out in the program.*

*If there is one thing I have to say bad about the program is that it doesn't have a mirror effect while your drawling, but even that is such a minor problem that I myself kind of forgot about until now writing this review.*

*Overall, it's a fantastic program and I can't wait to see what else they do with it down the road.. This is an interesting litte game that can get really difficult ! It might seem casual enough, but you are so mistaken.. it gets almost impossible to get max stars, or even pass a level! after unlocking the 4th zone. But it's a great fun little game, with easy achievments. Can't say this is a bad game.. Battlefield: 2142's servers weren't shut down for this.. This is a kinetic novel, there are no choices. It is a short collection of ghost stories.*

*This game barely earns a recommend from me. I score it 5 out of 10.*

*- Its FREE and under an hour.*
*- Its an easy 100% achievement. The hardest challenge you face is you need to click 1000 times (when I finished the game in 700 clicks)*
*- The art and music are decent.*
*- There are a couple decent stories included, but certainly nothing scary.*

*Its an ok time killer if you need a quick story fix.. Oh my god. This game is a train wreck compared to gems like Hollow Realization and Fatal Bullet. The models are awkward, the movement is slow and sluggish, every hit knocks you down, the combat is clumsy (besides the auto targeting system; that is actually very good), and the animations are terrible. This is a ♥♥♥♥ing travesty, and this is coming from someone who has sunk probably 200 hours into Hollow Realization on PS4. This game made me quit out after the first episode, it was so bad.*

*Save yourself the headache.. A middling card game. Poor graphics, easy to learn but tactic options are extremely limited; ideal for kids. Not bad to pass few whiles although has expansions; maybe good against other player, because AI is shamefully cheater. Would be better with a turn-based system and (especially) big maps. The first loading time is long, afterwards runs well. Only worth with a huge discount.*
