If I have a function in an aspx page for example: PageMethods.InsertText(1); How could I implement this in a similar way in C#? Thanks A: You can just simply create a public method in a class and call it like any other method.

```
public partial class _Default : System.Web.UI.Page { public void InsertText(int value) { //Do something } } (26%) vs.14 (
```
